

SHIBOKO

Whitepaper

WHY SHIBOKO?

2021 was unprecedented for crypto. **The historic bull run** brought millions of new investors and billions of dollars. With this new wave of investment, thousands of new projects began popping up. Some of these, like SHIB, were an immense success and made overnight millionaires, but the large majority failed, were abandoned or were planned scams from the start.

There are now three things that memetoken investors are looking for:

- A way to differentiate good projects from bad projects.
- A way to present good projects and their strengths to the public, so other investors can come.
- Utility for the token, so they can earn a return.

Shiboko is going to solve all three of these problems.

We want to establish an ecosystem of utilities that benefit the holders. One of them is an NFT Minting, and another is establishing an NFT Marketplace.

Unlike other IDO platforms, the Shiboko team has one of the strongest inbuilt marketing platforms available. The team has the strongest crypto marketing background of any IDO and the best marketing assets for promoting dog tokens.

We're then building interconnected DEFI ecosystems, so these projects can be easily monetized.

VALUES

The most important ingredient for any developing crypto, especially memetoken, is trust.

we're building trust on three core value pillars:

- Community
- Transparency
- Longevity

The best way to earn someone's trust is to interact with them personally. The longer and more intimately you know them, the more you trust them (that's why we trust our families above everyone else).

We're going to include our community every step of the way and be transparent about all our plans and even our failures. The longer we keep this up, the more trust we will build and the higher the value we bring. So jump in, ask us a question and let's establish a relationship!

TOKENOMICS

We're minting 999 trillion tokens and burning 399.6 trillion right away. And more 49.95 trillion total in the burn event.

3% of every transaction goes to the liquidity pool, to make sure to prevent huge price drops.

5% Reflection rewards. Simply hold SHIBOKO to earn more SHIBOKO, sent automatically to your wallet.

In line with our values, we're going to reward everyone for simply participating in Shiboko. 5% of every transaction is spread across the wallets of all users. This means that if you simply buy and hold SHIBOKO, you're getting passively rewarded with every transaction. The longer you've been a community member holding SHIBOKO, the more transactions you benefit from.

Since we **burned 40% of the token at the start**, a part of these reflections also goes into our burn wallet, making the token naturally deflationary and increasing the price with every transaction.

3% of every transaction goes into Liquidity .

Token distribution below:

- 40 % burned at start
- 5% burned event
- 47 % for investors
- 8 % team wallet & marketing

LIQUIDITY

We're **locking liquidity for three years**, so there is no possibility of a rug pull or pump and dump.
